**DETAILED ACTION**

***Allowable Subject Matter***

Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose or teach a vibration type actuator having a frequency setting unit that modifies a frequency of the frequency signal according to whether the drive direction of the actuator is the same or the reverse of the last drive direction.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Meyers Re.30,068 and Meyers 3,401,892 both describe a device that keeps track of the last drive direction of a motor and reverses the drive direction when the motor is restarted. There is no associated change in frequency for the motor drive current. Onuki et al. 5,206,677 teaches the problem of backlash in a lens driving system and teaches a method of removing that backlash comprising applying a small current to the focusing lens driving motor to cancel the backlash before the motor is driven to reposition the lens. There is no suggestion in Onuki et al. that it might be possible and/or desirable to change the frequency of the drive signal to the motor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Judson H. Jones whose telephone number is 571-272-2025. The examiner can normally be reached on 8-4:30 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Darren Schuberg can be reached on 571-272-2044. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
